CERVELO ADURO BASEBAR CONVERSION PLATE FOR D2Z USP SYSTEM

- Plate attached to moulded shims (supplied) through to basebar with 4 x M5 bolts (supplied)
- Angled shims attach to plate – four placement options
- D2Z pole clamp offsets the podium width by 15mm each side (30mm total) e.e using the 90mm straight holes and mounting the pole clamps inwards, the pole ends will be 60mm wide.

Outer holes (120mm spaced) can have shims on straight or angled (7 degrees)

Inner holes (90mm spaced) can have shims straight or angled (2.4 degrees)
